Reported by: Priya Sharma (psharma@servicedesk-simulator.com)
Department: Engineering | Location: Floor 3
Contact: x6225
Printer: Floor3-Printer-C

Issue Description:
I can't print anything to the department printer. When I send a print job nothing happens. I really need to get a few things printed before my afternoon meeting.

Troubleshooting performed:
- Restarted my computer
- The printer is on and has paper

Business Impact:
Cannot print reports needed for afternoon meeting.

How to resolve this

1.) Open Documentation → "Print Server" and note the correct printer IP.

DOCUMENTATION STATION

Search docs, SOPs, credentials...

DOCUMENTATION > SERVER DOCUMENTATION > Print Server

ENVIRONMENT OVERVIEW1

PRINT01 Specifications

IP Address:10.0.2.40

Location:Server Room B

OS:Server OS 2022 Standard

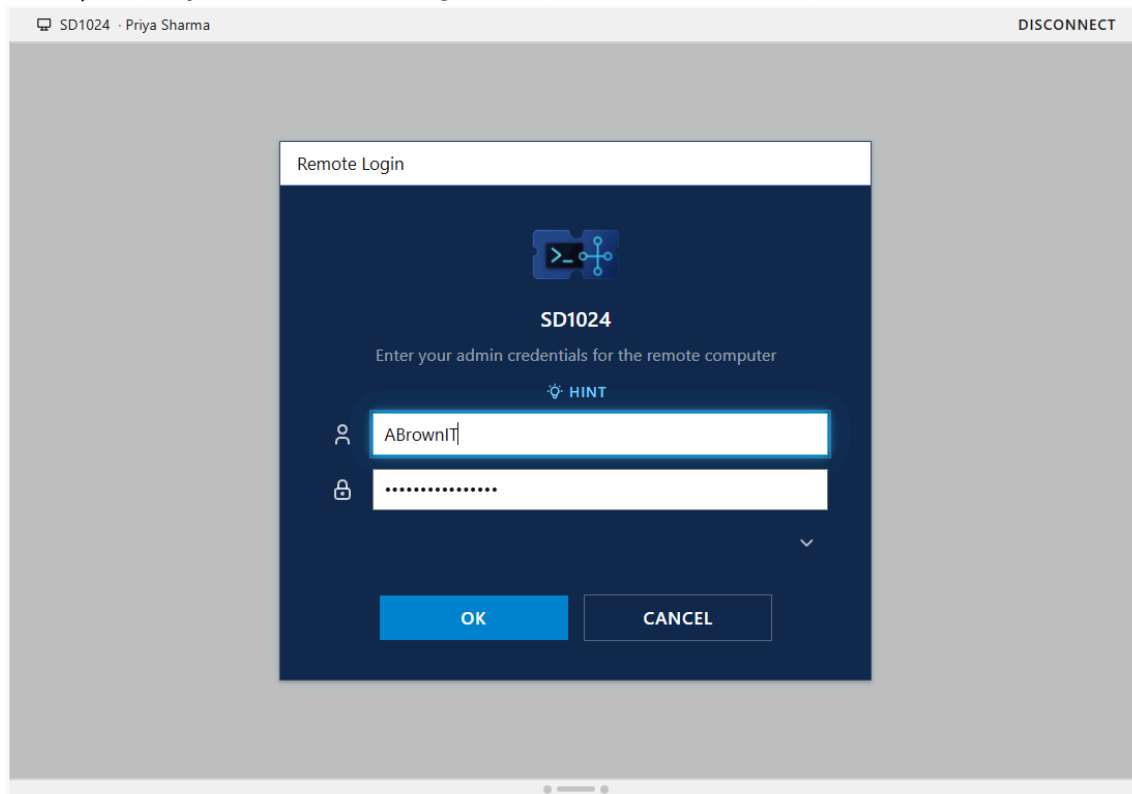

Role:Centralized print queue management

Management:Print Management console (printmanagement.msc) on PRINT01, or \\PRINT01 share (restricted to IT)

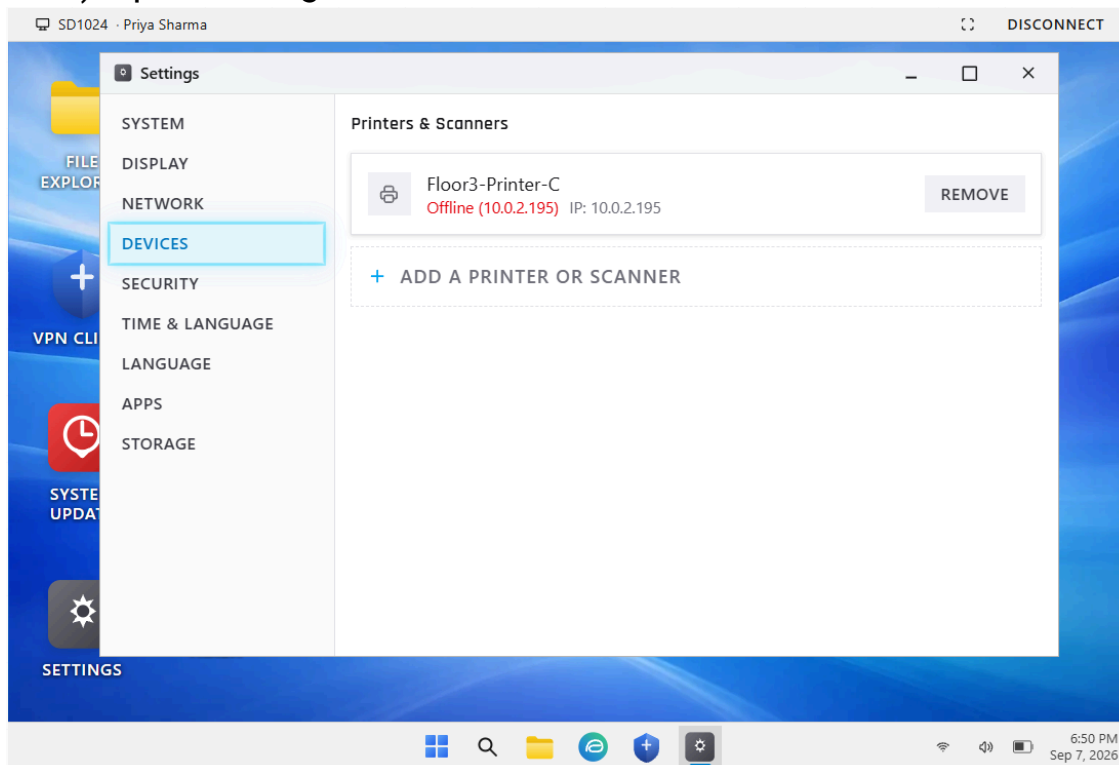

Network Printers Reference Table

Printer Name	IP Address	Model	Location	Features
Floor1-Printer-A	10.0.2.50	Office laser printer	Floor 1	Color, 50ppm, duplex
Floor2-Printer-B	10.0.2.51	Office multifunction printer	Floor 2	Color, 55ppm, staple
Floor3-Printer-C	10.0.2.52	Office laser printer	Floor 3	Color, 50ppm, duplex

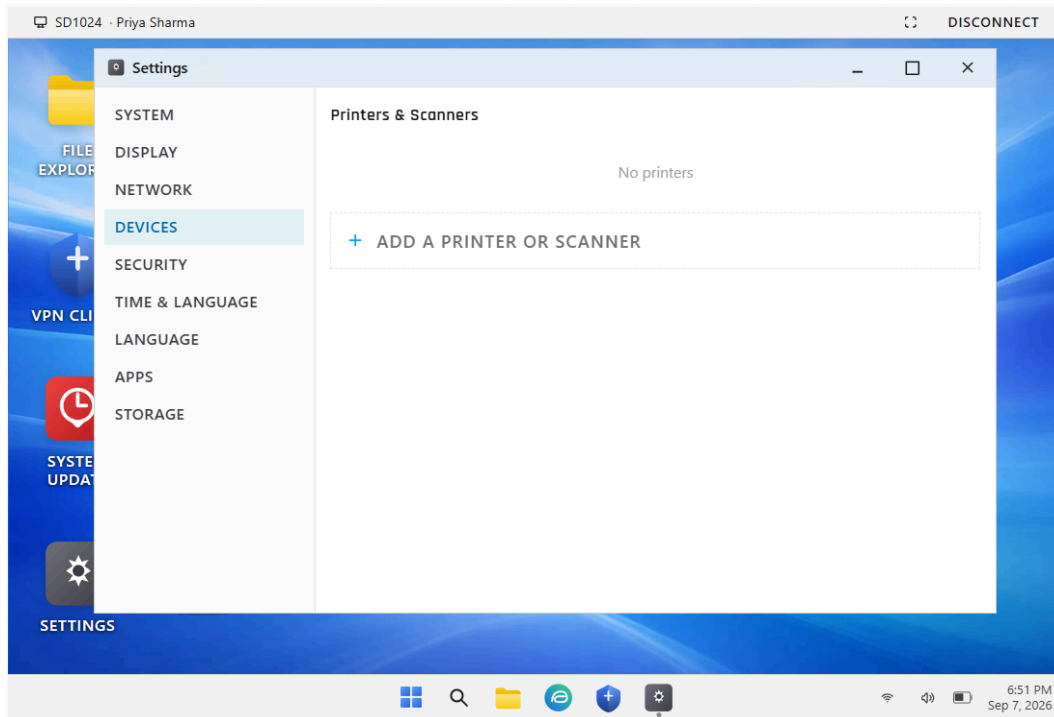

2.) Complete remote login to the user's PC.

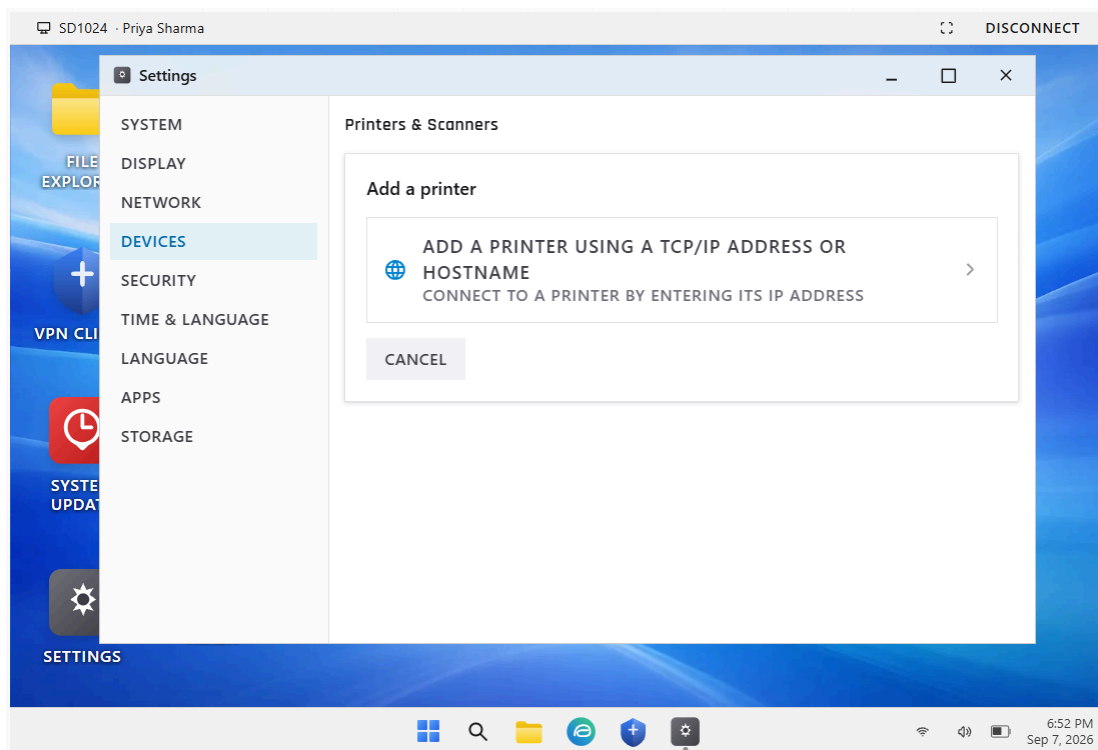

3.) Open Settings → Devices

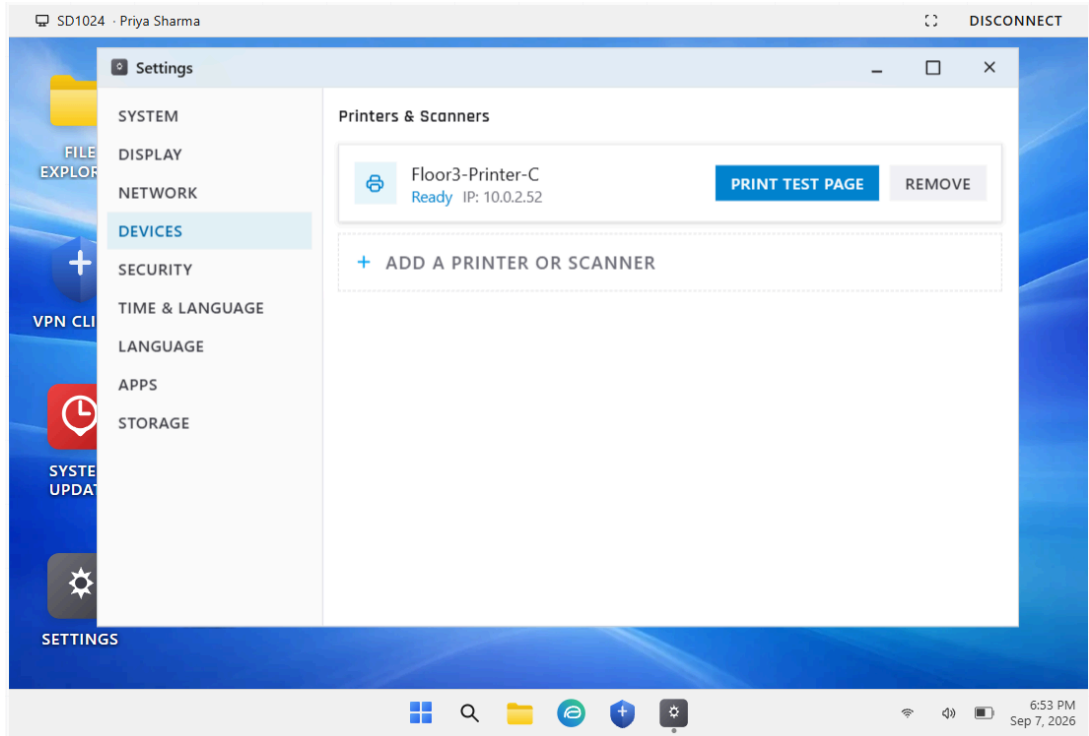

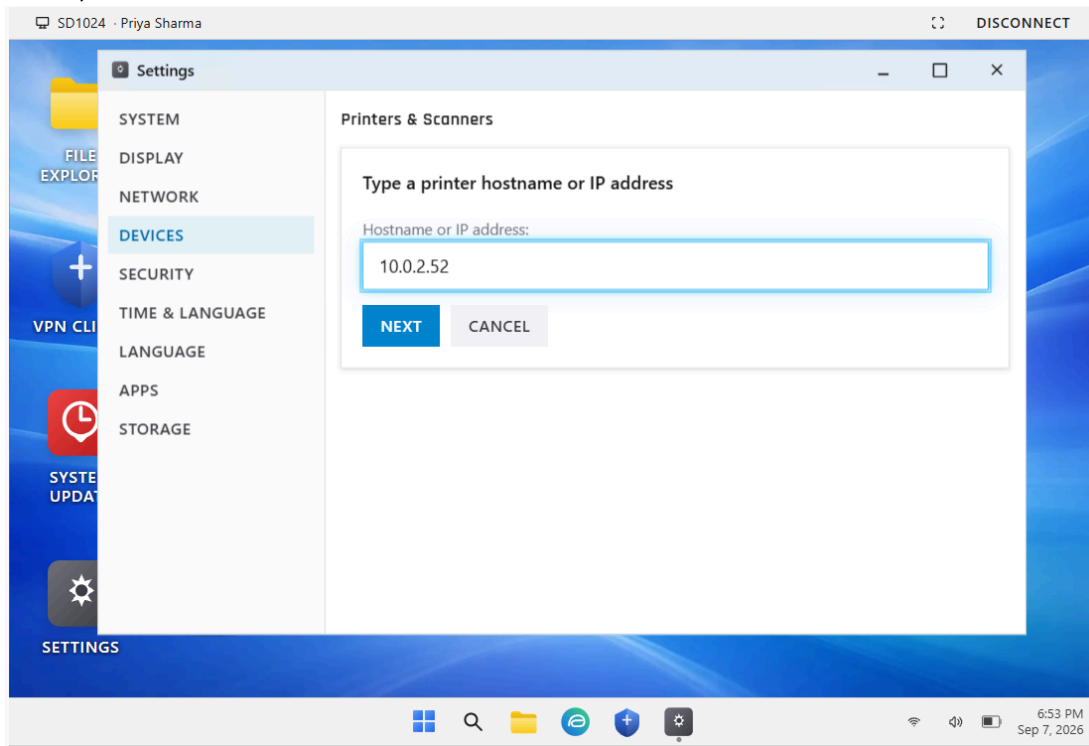

4.) Find and remove the offline printer

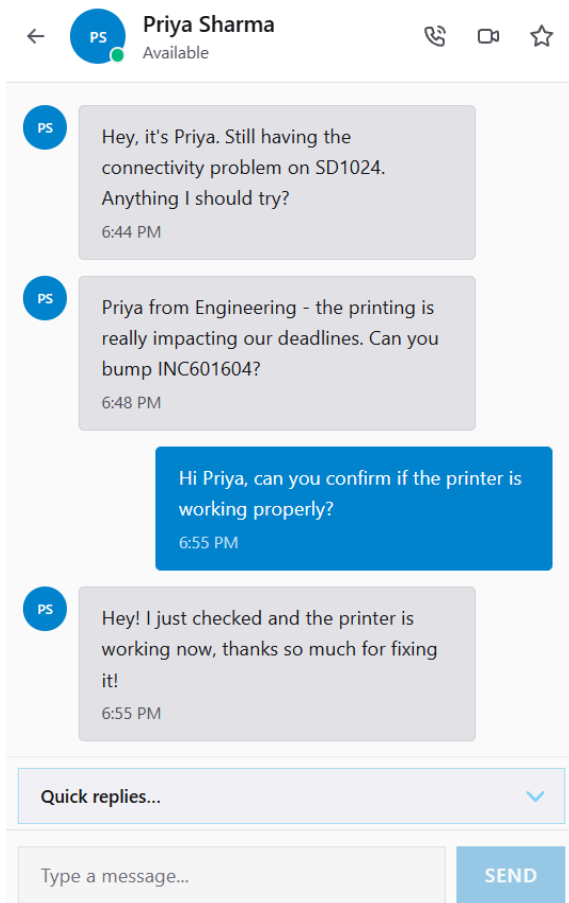

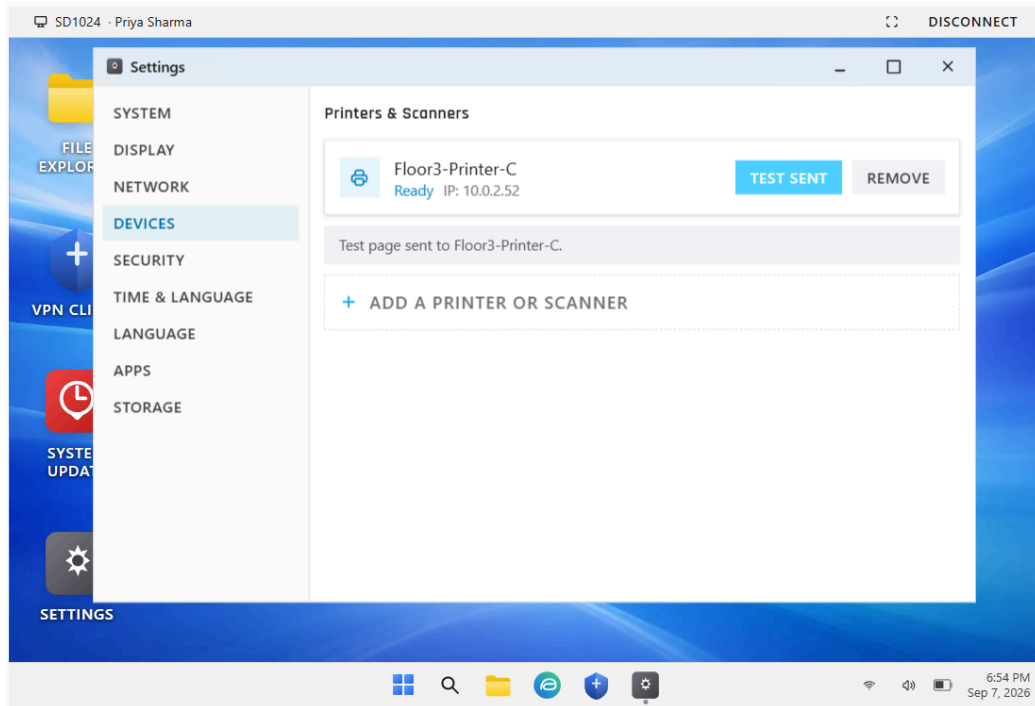

5.) Click "Add a printer or scanner" → "Add a printer using a TCP/IP address or hostname"

6.) Enter the correct IP from the documentation

7.) Print test page, and confirm with the user that printing works.

RESOLUTION NOTES (optional)

When one user cannot print but others can, the issue is usually a stale printer IP on that specific workstation. Removing the old printer and re-adding it via TCP/IP with the correct IP address fixes the connection.
